

Book yourself a test drive and find out more about this revolutionary crossover vehicle from Peugeot on our website www.peugeot.co.za or from your cellphone on mobi.peugeot.co.za.

NEW TECHNOLOGY. NEW RESPONSIBILITY.

NEW
3008

INTRO A FIRST OF ITS KIND

The Peugeot 3008 blends the strongest attributes of different motoring concepts to offer an original solution to drivers seeking versatility, modernity, practicality and peace-of-mind. Fully manufactured at our plant in Sochaux, France, and a first of its kind for Peugeot - the 3008 is a true crossover vehicle.

INTERIOR A TRUE CROSSOVER

Open the door to a spacious, intelligent cabin, designed with driver and passenger comfort as the priority. Front seats in the 3008 offer the best possible lateral and lumbar support while 876mm of rear headroom keeps taller passengers comfortable. The 3008 is loaded with modular storage spaces make it easy to stow all your bits and pieces - flatten the Multiflex seats and watch the load capacity more than triple from 512 litres to a massive 1 604 litres!

EXTERIOR LOOKIN' GOOD

Even at a glance, the 3008 is strongly and dynamically, Peugeot. High, aerodynamic lines run along the body to give the 3008 an imposing feel that emanates a robustness seen in few of its contemporaries.

ENGINES AND THE ENVIRONMENT GET THERE IN THE GREEN

The 3008 is available in three power trains featuring two petrol engines (the 1.6 litre THP or the 1.6 litre Vti) and the new 2.0 litre HDi FAP diesel engine. The four-cylinder, 16 valve engines are constructed using the most advanced technologies and offer particularly lowered fuel consumption, CO₂ emissions and great through-the-range power.

THE RIDE SIT BACK AND ENJOY

Rigid suspension and very wide rear and front wheels tracks keep the 3008 stable in and out of corners while Dynamic Roll Control and adjustable Grip Control* compensate for the tendency of tall vehicles (with higher centres of gravity) to roll in corners or when taking evasive action. Think of it as a safety net.

DRIVER ASSISTANCE SAFE AS HOUSES

Like all Peugeots, most of the features in the 3008 offer safety as a secondary benefit. Aside from the 3008's rigid body structure and top-notch suspension, safety and the electronic assistance equipment include:

- A dashboard retractable* Head-up Display (HUD) unit coupled with Peugeot's Distance Alert* feature.
- An automatic electric parking brake as standard. It disengages as soon as the driver begins to accelerate.
- Hill Assist* in the 3008 maintains a permanent dialogue with the ESP (Electronic Stability Program).
- Park Assist* emits an audible alarm that gets louder as the vehicle gets closer to an obstruction.

* Available of selected models only.
